Thomas Arnolds

KLEMM'S

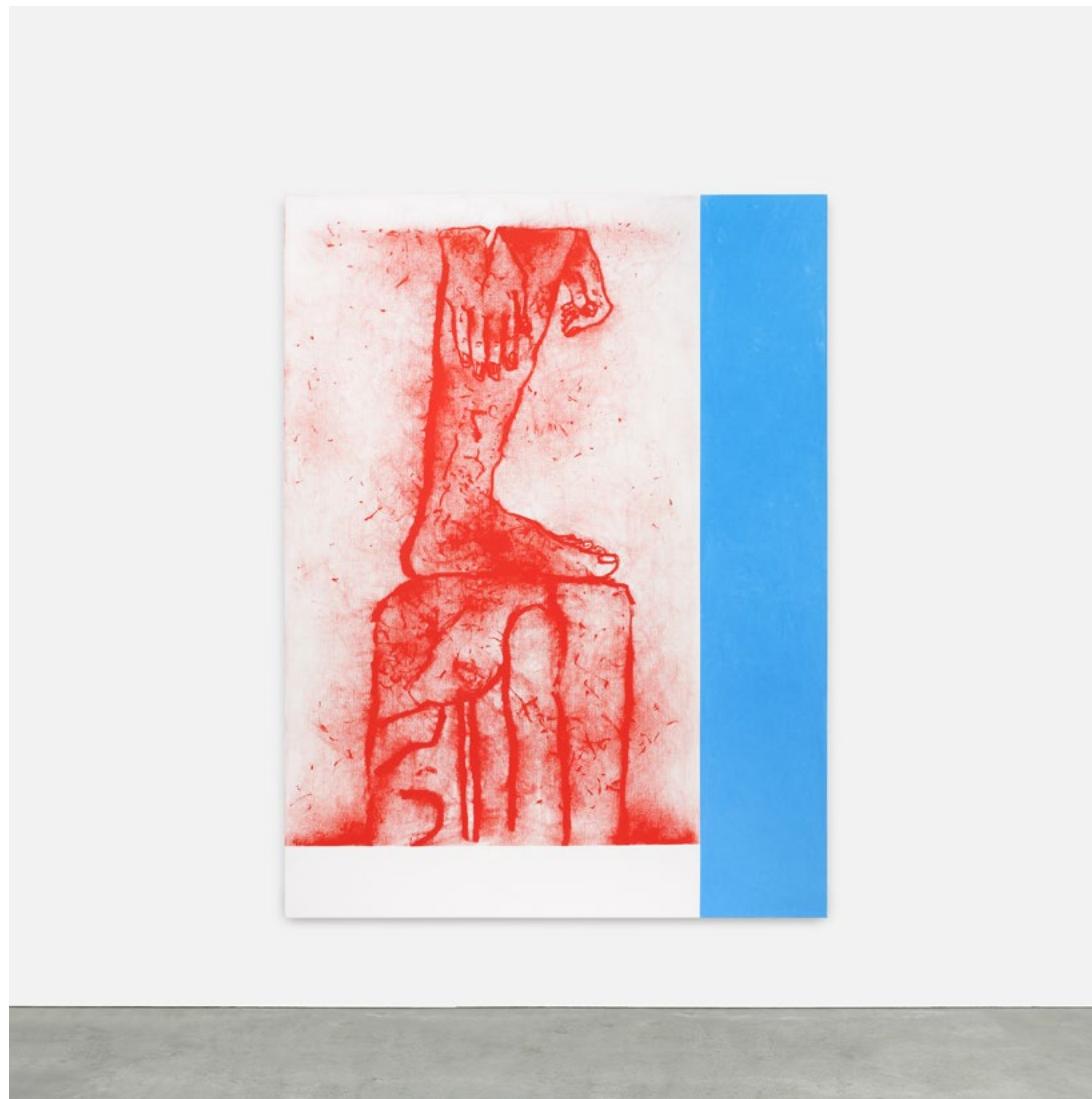

In his work, Thomas Arnolds pursues the fundamental interest in constantly re-exploring the possibilities and conditions of painting. In doing so, he develops a complex and at the same time consistent position that negotiates central issues of the medium in a coherent balance of at first glance contradicting designs: abstraction vs. Figuration; minimal vs. gestural; Space vs. Image; Surface vs. Matter or hard-edge vs. Duct and free drawing ... the essence of his pictures lies in their surprising but always concise combination.

The visual vocabulary manifests itself as broadly as it is consistent - interiors, tool fragments and banal everyday objects meet crude bonsai arrangements, architectural forms or the iconography of ancient column arrangements. The correct representation of the selected image content is of secondary importance, rather the motifs serve as placeholders or a pure 'occasion' to step in front of the canvas at all.

Arnolds always works in series, but deliberately does not develop his work linearly in clearly defined groups of works. Based on an initial, conceptual penetration, what has already been introduced is mixed up in the process and is confronted with new technology or changed painterly access. The fundamental meaning of 'matter color' remains constant, which Thomas Arnolds always knows how to use in its deep quality between materiality and volume, between symbolism and metaphysical aspects.

Thomas Arnolds has created a set of instruments that are as precise as they can be used variably, a 'free set of rules' between intellect and gut-feeling, reflection and anarchy, with which he pushes his oeuvre forward as a radical proposal on painting.

„....I needed an impetus to paint (...) and then all I did was to exchange all the painting vocabulary that was there, or use it to create new compositions, and from this practice there emerged a new reality, the reality of painting....“

„...In any case, the starting point for my project on painting was this serial mode of working. That's the concept“

„I reconstruct things in a painting of course...(...) And I use this vocabulary formally as well, because it gives me a form...but of course also a content that I can control...“

An abstract painting featuring a dark gray or black background. It is overlaid with several thick, white, gestural marks. These include a large, irregular shape in the upper left, a prominent horizontal band across the middle, and a vertical line on the right side. There are also smaller, more isolated white shapes, such as a small circle near the bottom right and a thin vertical line on the far left.

„...exactly...I believe that this forms something like a starting point (...)
– the beginning of gesturally induced hard-edge painting.“
